EuHEA Conference 2024

Opening up perspectives on health economics

30.6.–3.7.2024, Vienna, Austria

The 2024 EuHEA Conference in Vienna will explore how health economics can be approached from different perspectives. Its comprehensive program will feature macro analyses at the health system level, research on the decisions made by key stakeholders, and microeconomic studies on consumption and behaviours of patients and health care providers. By bringing all these perspectives together, the program aims at fostering a holistic understanding of the latest research in the field as well as informing effective, equitable, and sustainable health policies.

The WU (Vienna University of Economics and Business) and the IHS (Institute for Advanced Studies) are delighted to host the EuHEA conference in the beautiful city of Vienna.
